Create a new object...

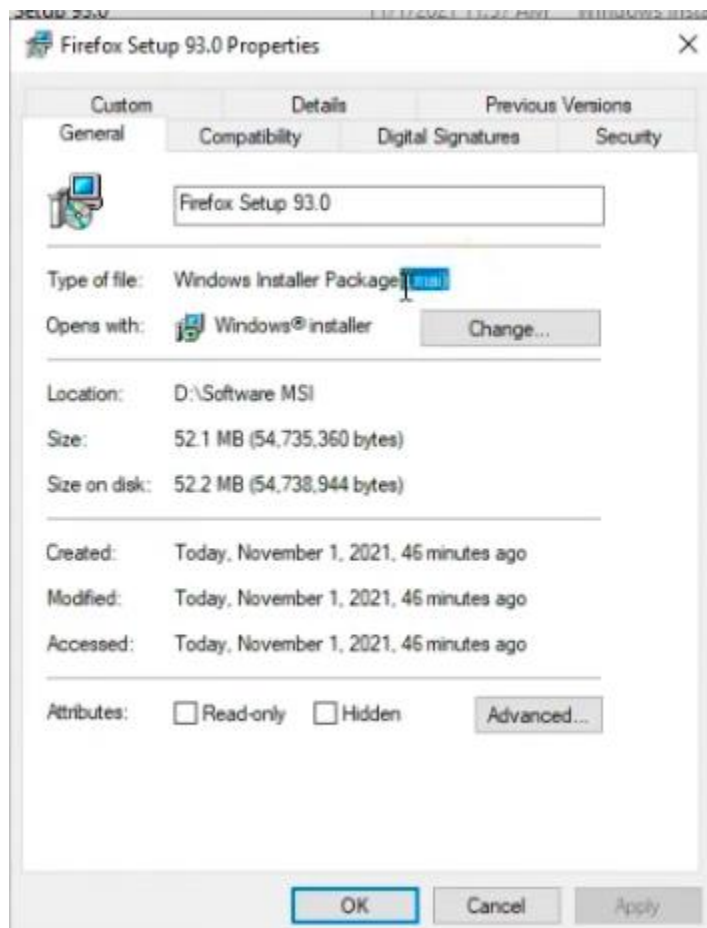

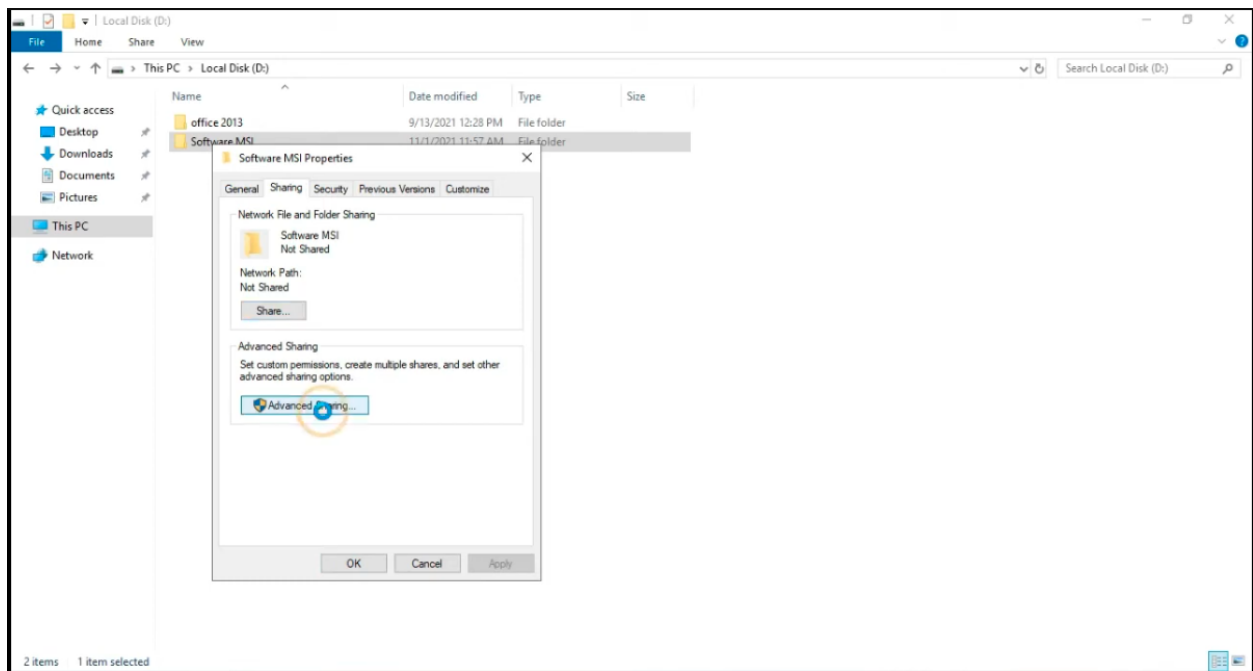

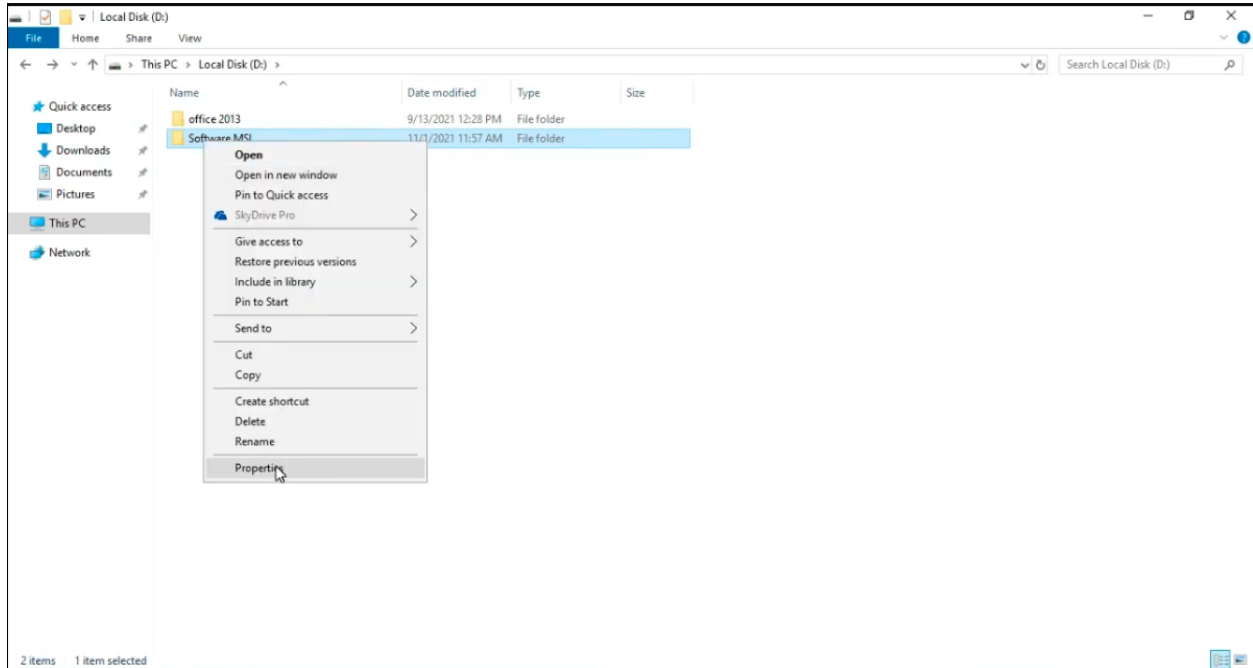

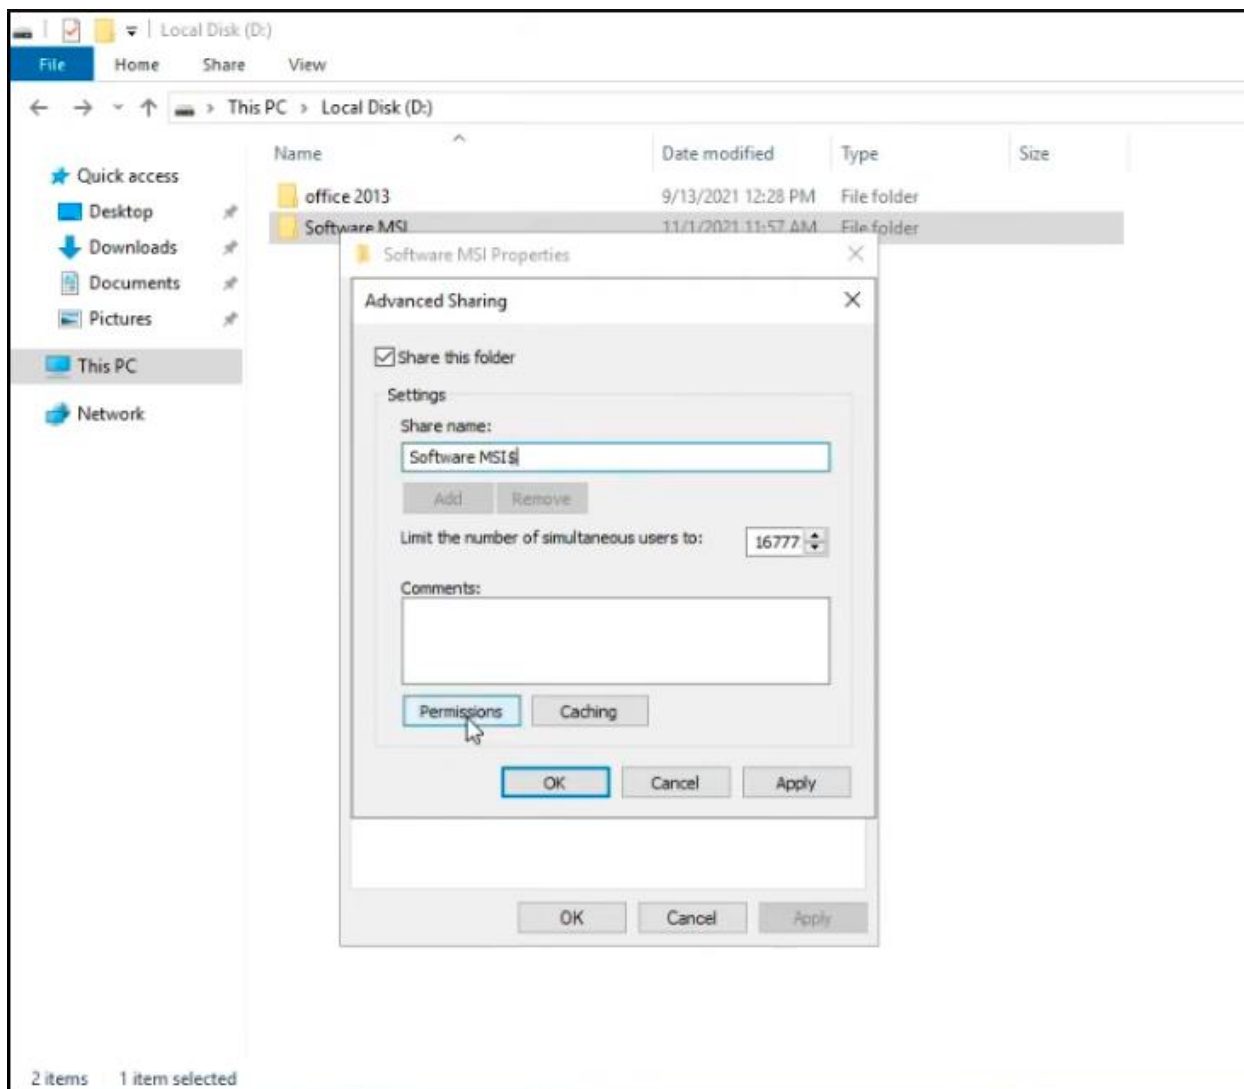

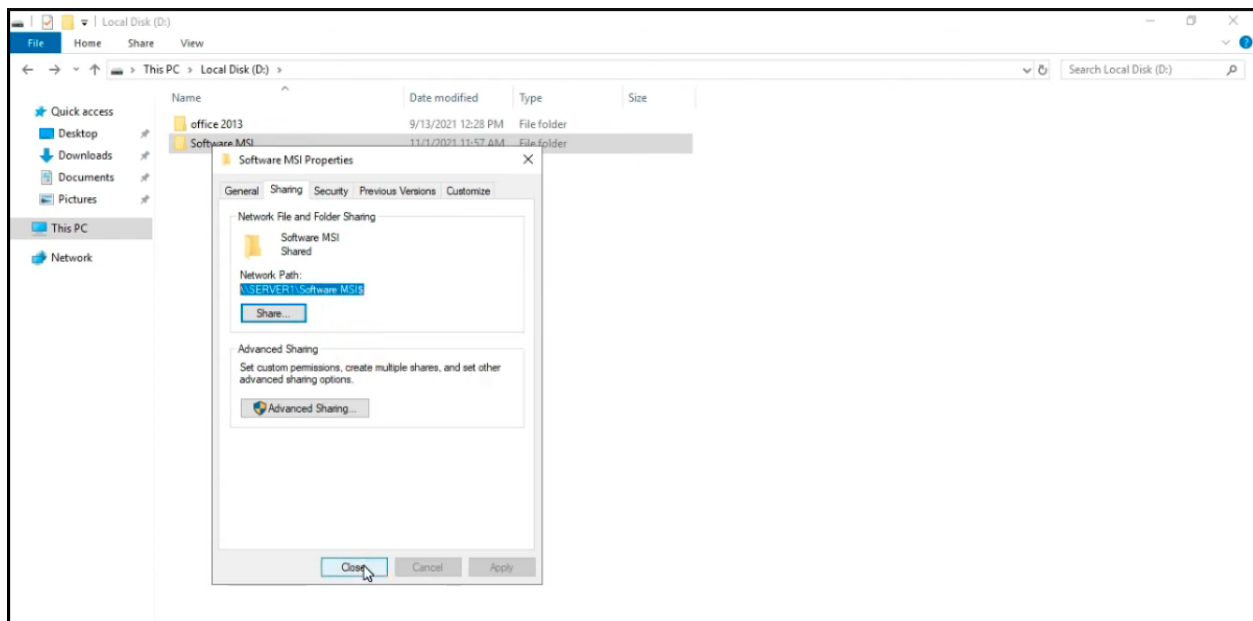

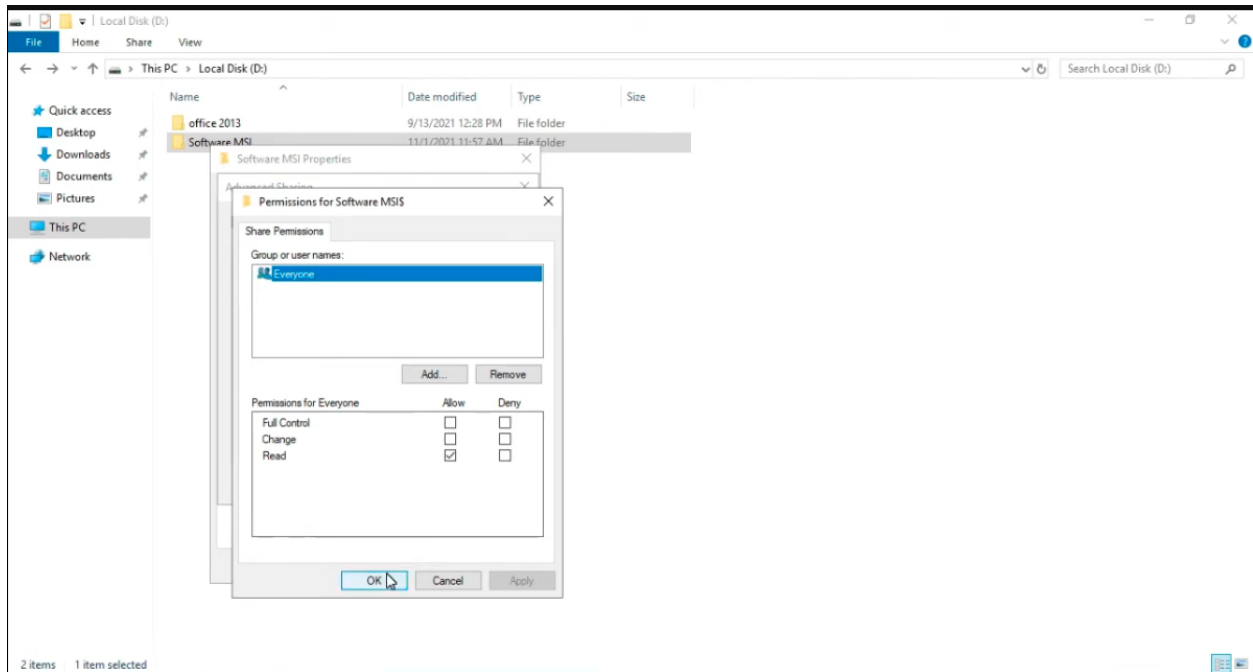

Store all software which you want to install on client machine

Go to properties of that files and must see that MSI file

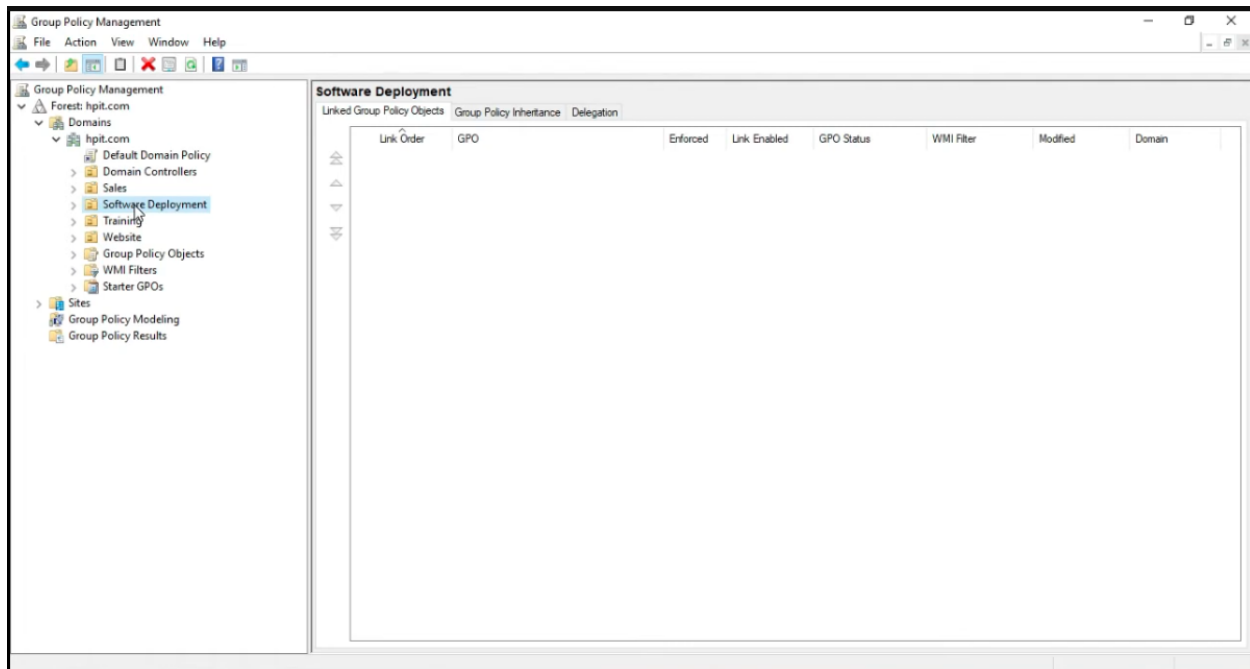

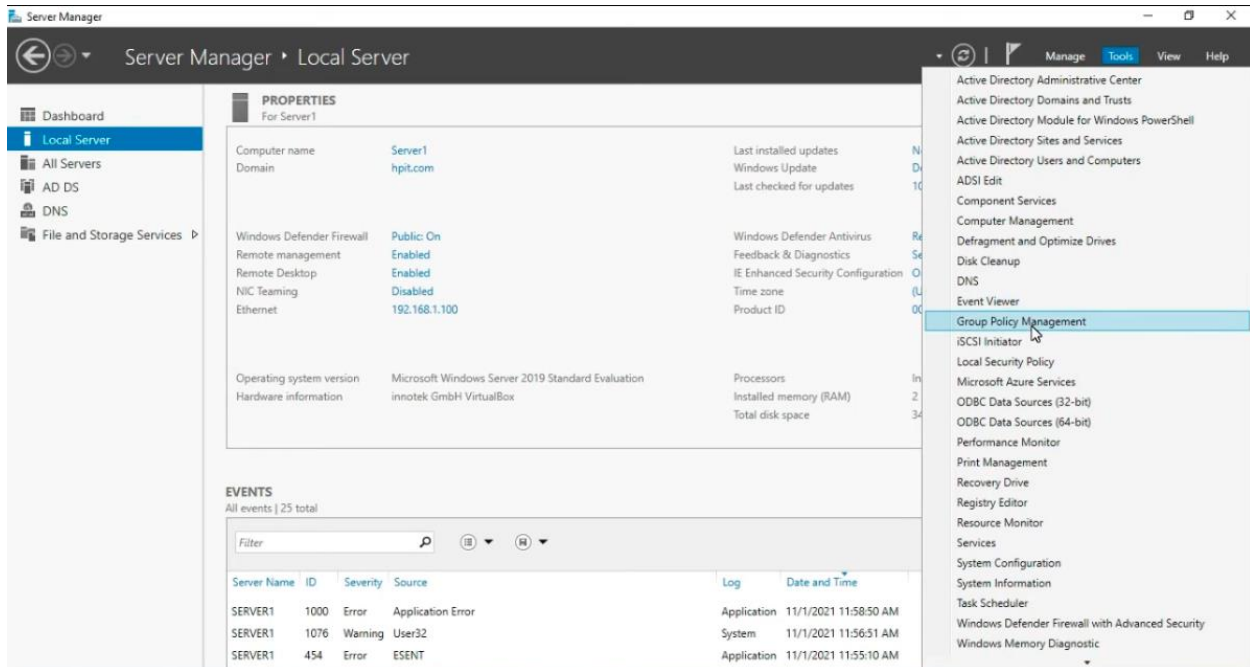

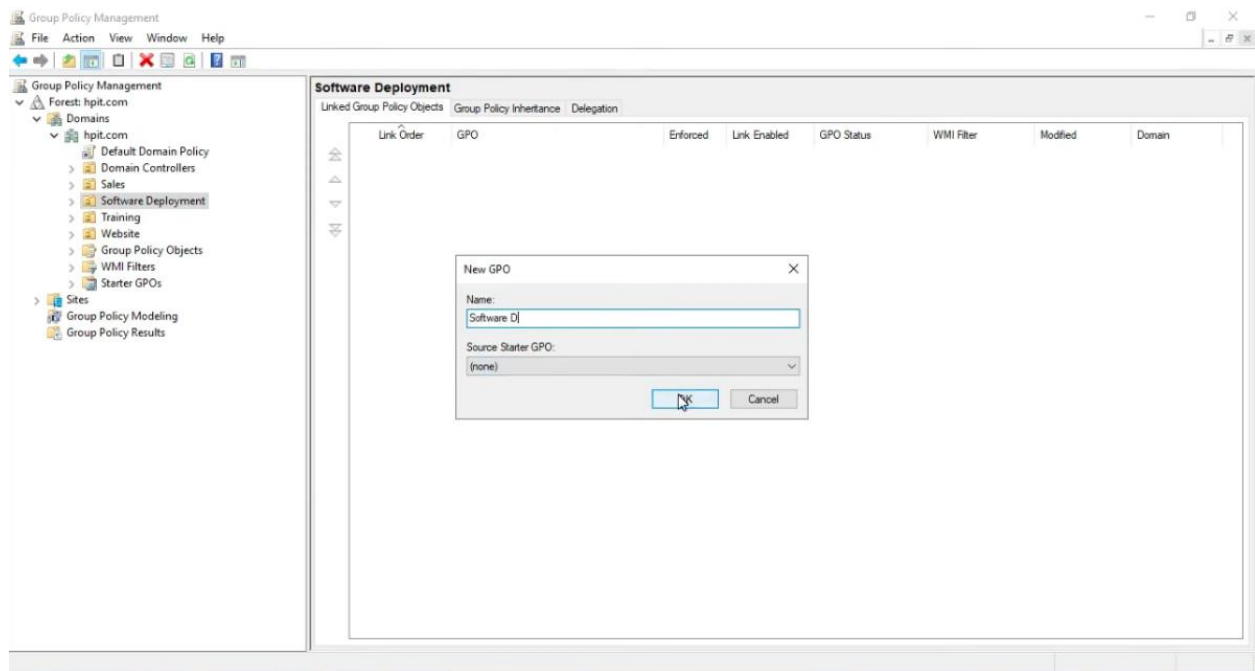

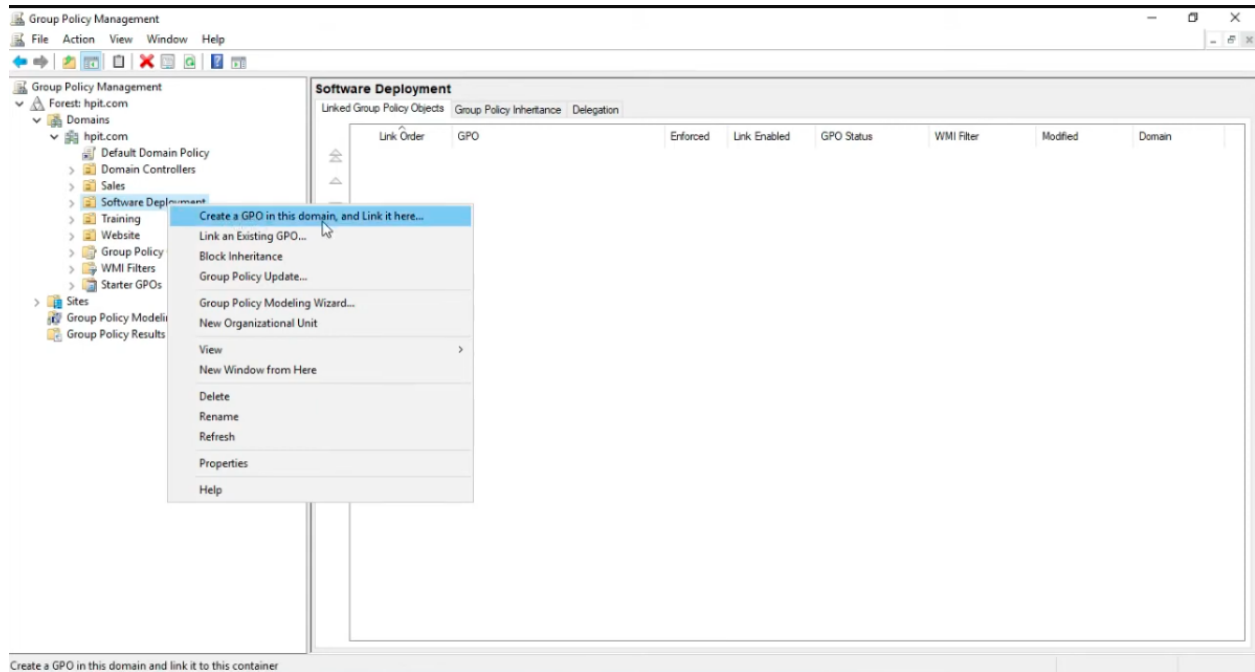

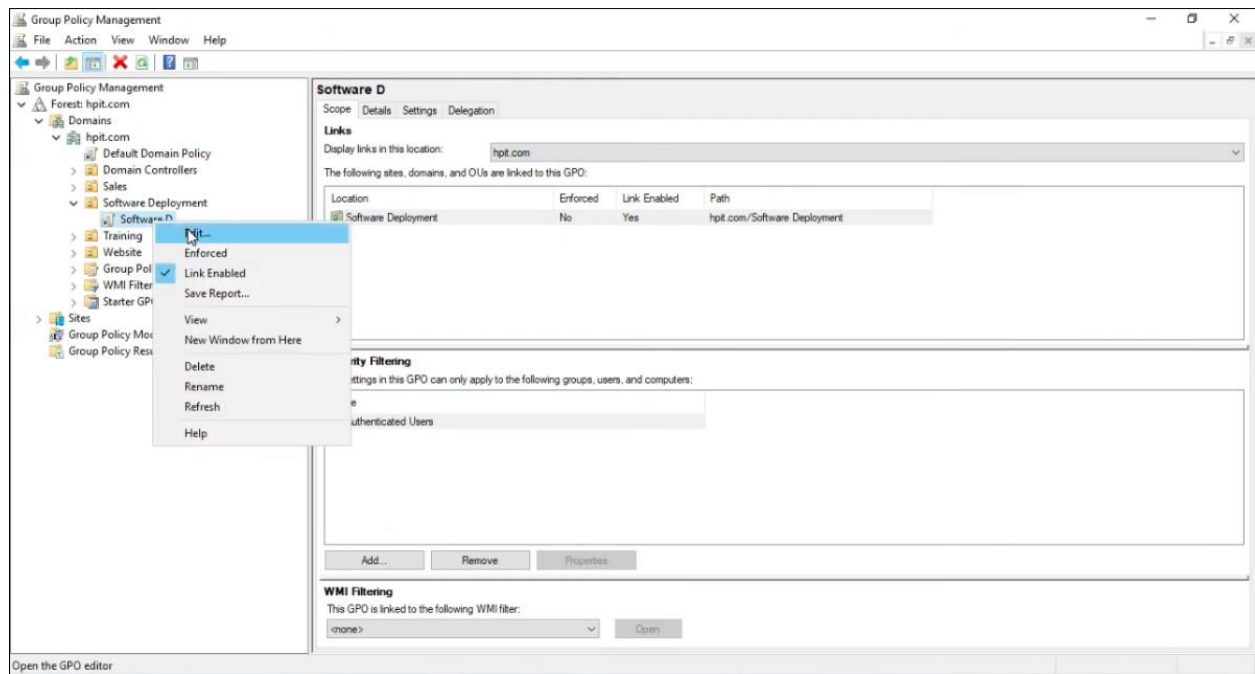

You see the complete path so copy that and click ok

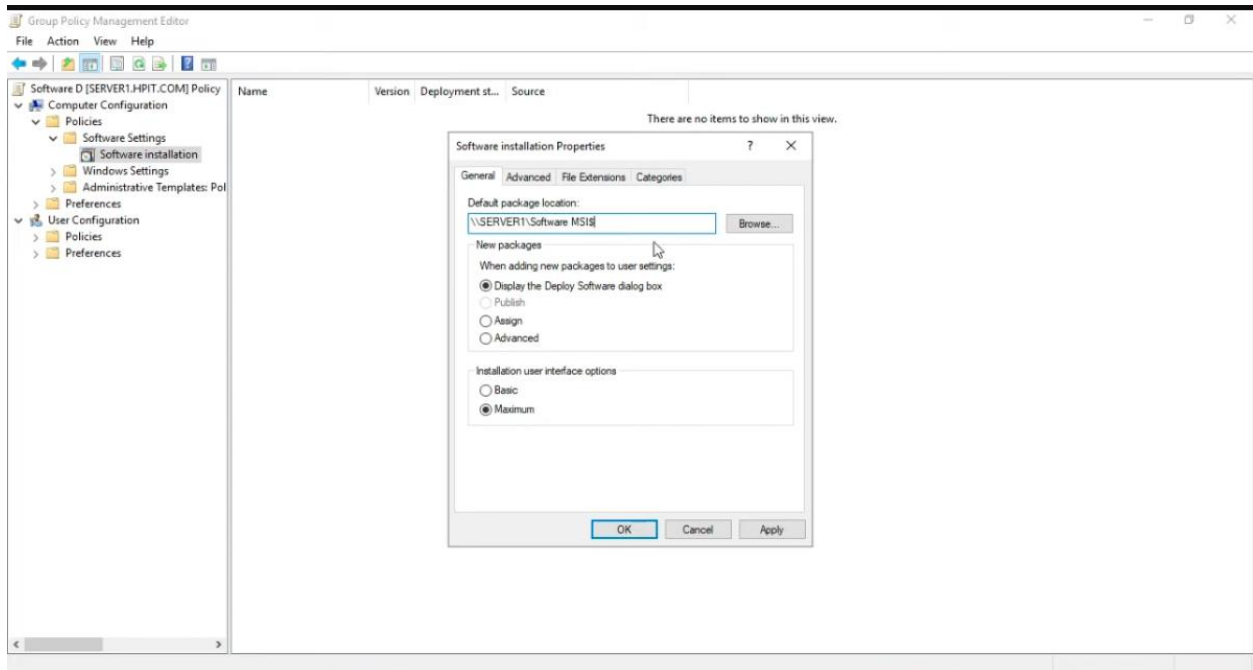

Then go to group policy management

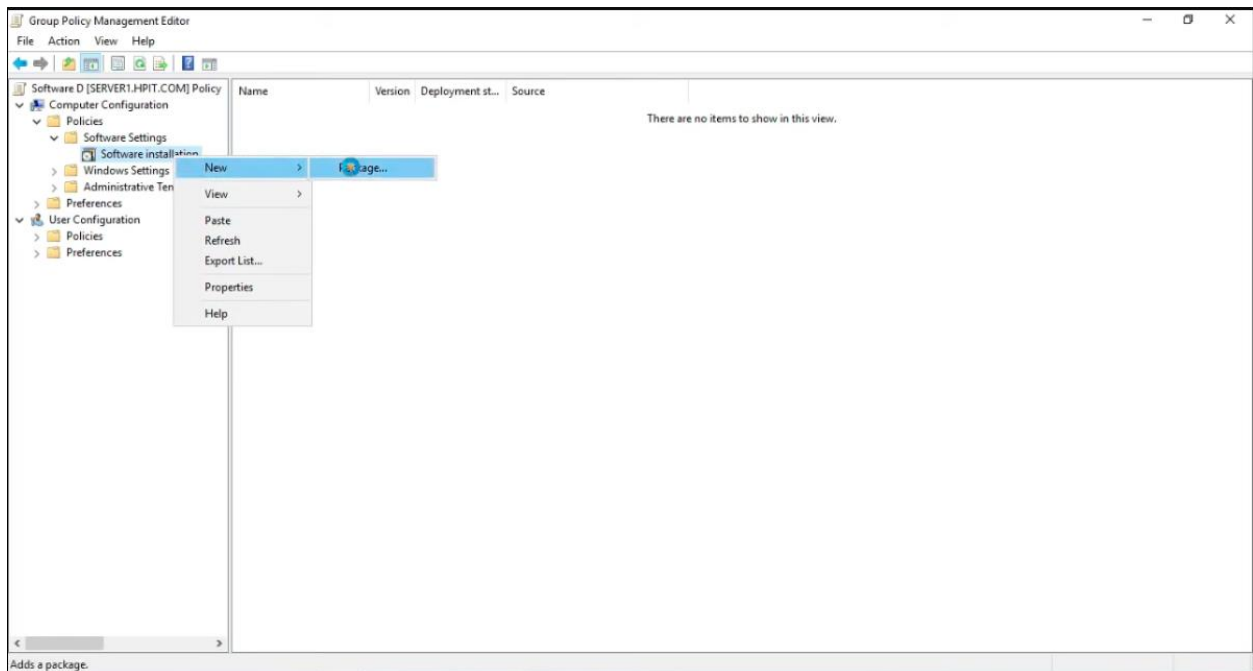

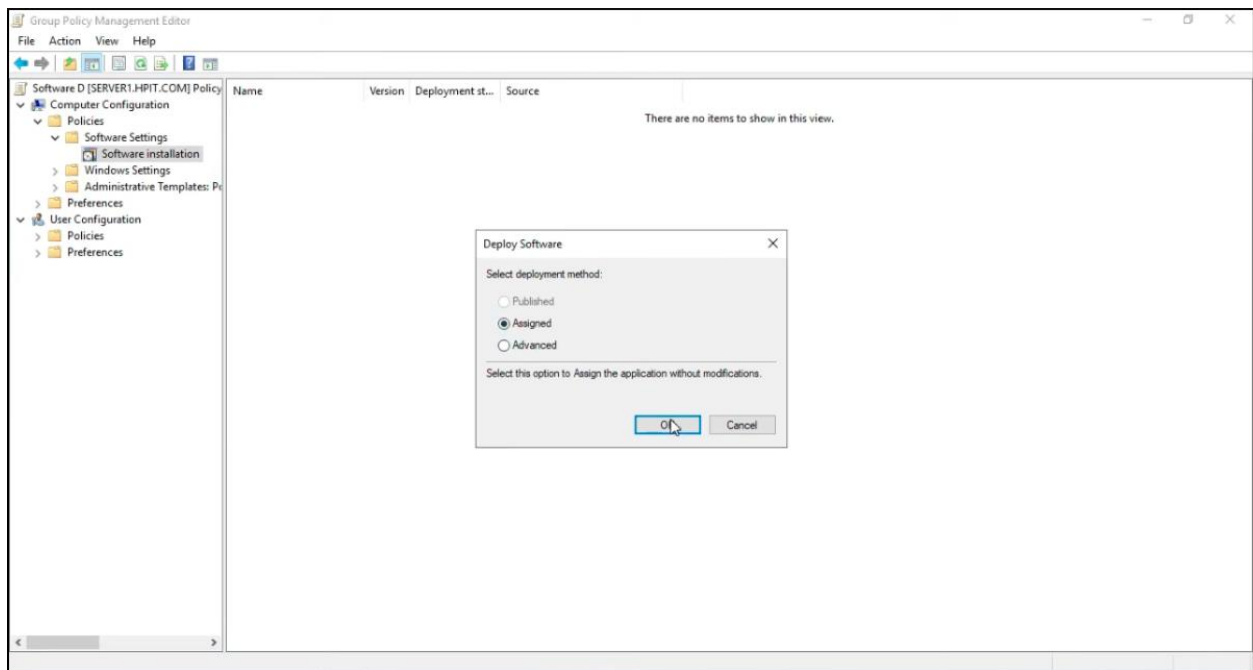

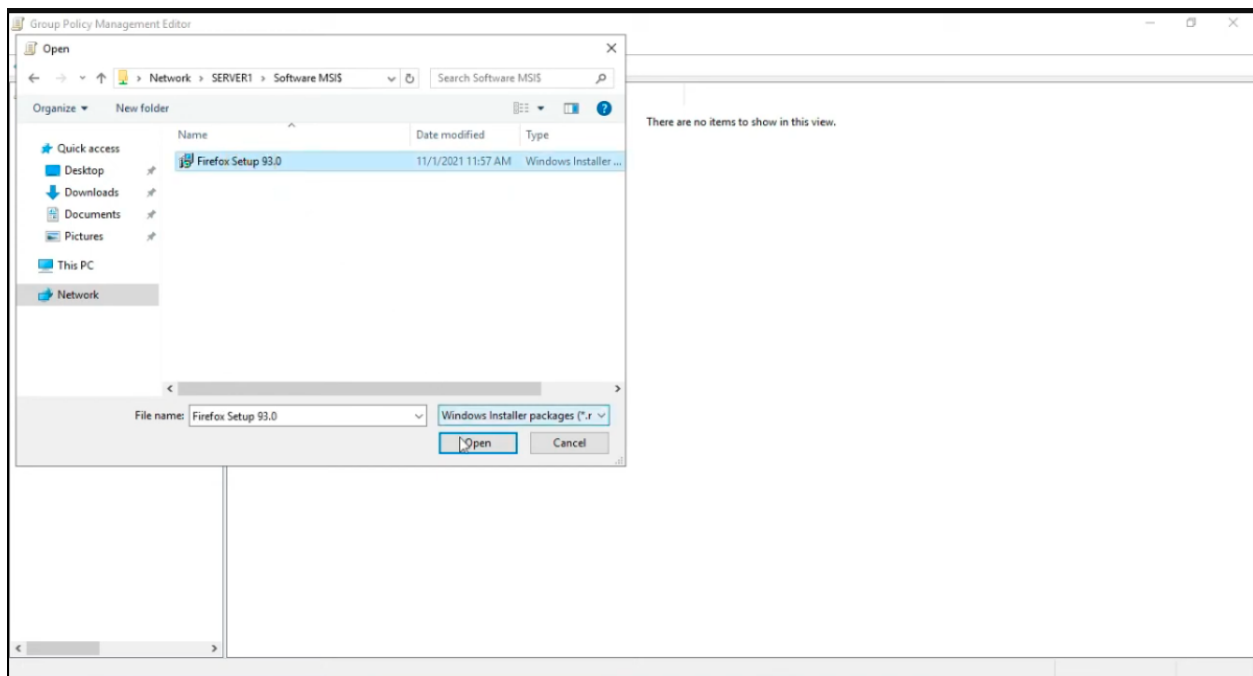

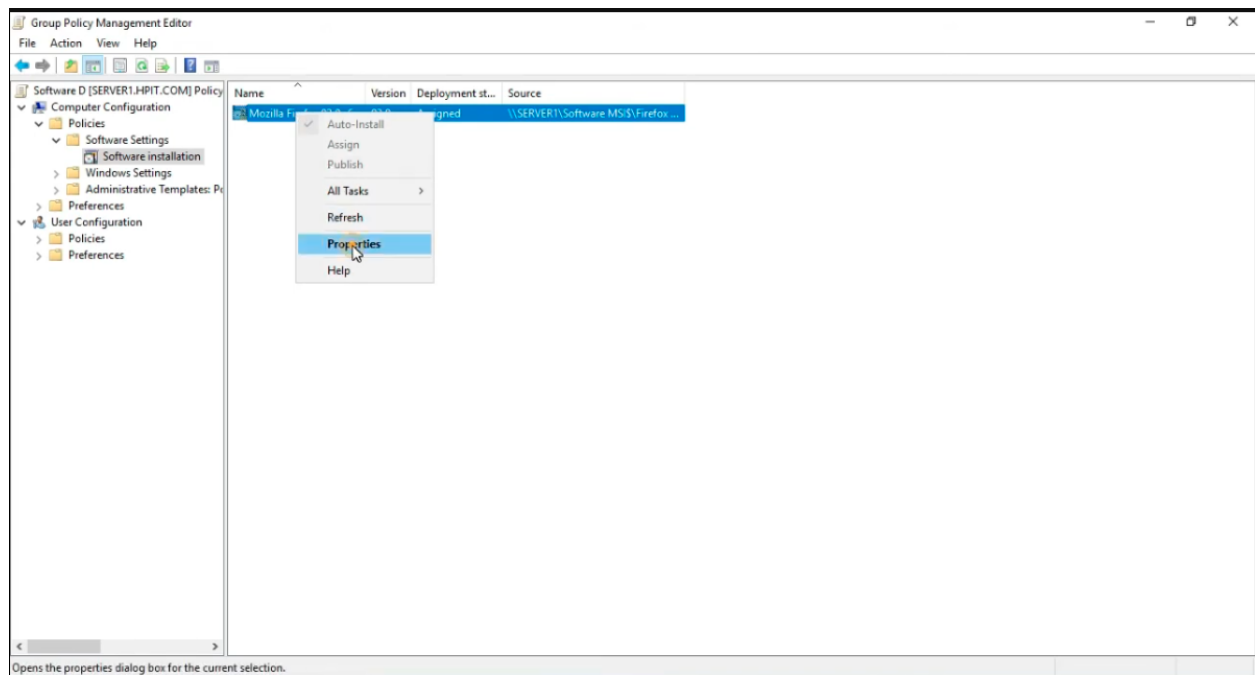

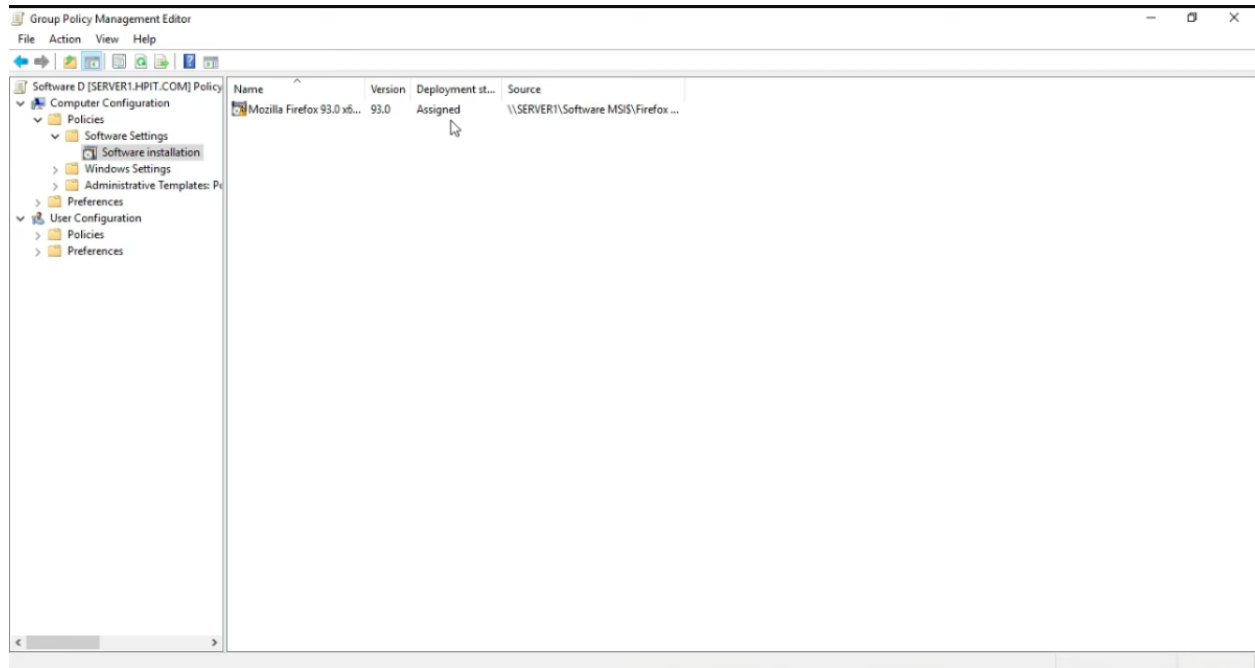

Then right click on the **software installation** and then goto its **properties**

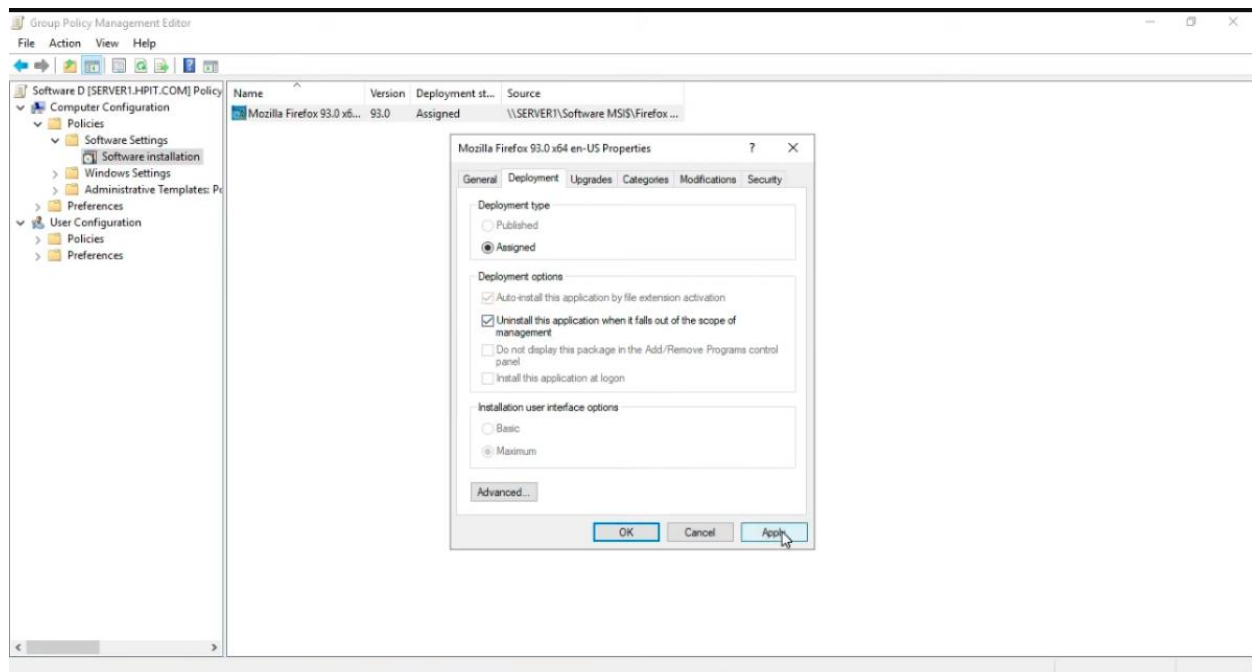

Then click on **apply** and then **ok**

Then update the **Group Policies on both Server + Client Machine** by **CMD (gpupdate /force)** and you see the software installed after restart your client machine
