

Windows Server 2019

Check either logged in as admin or not

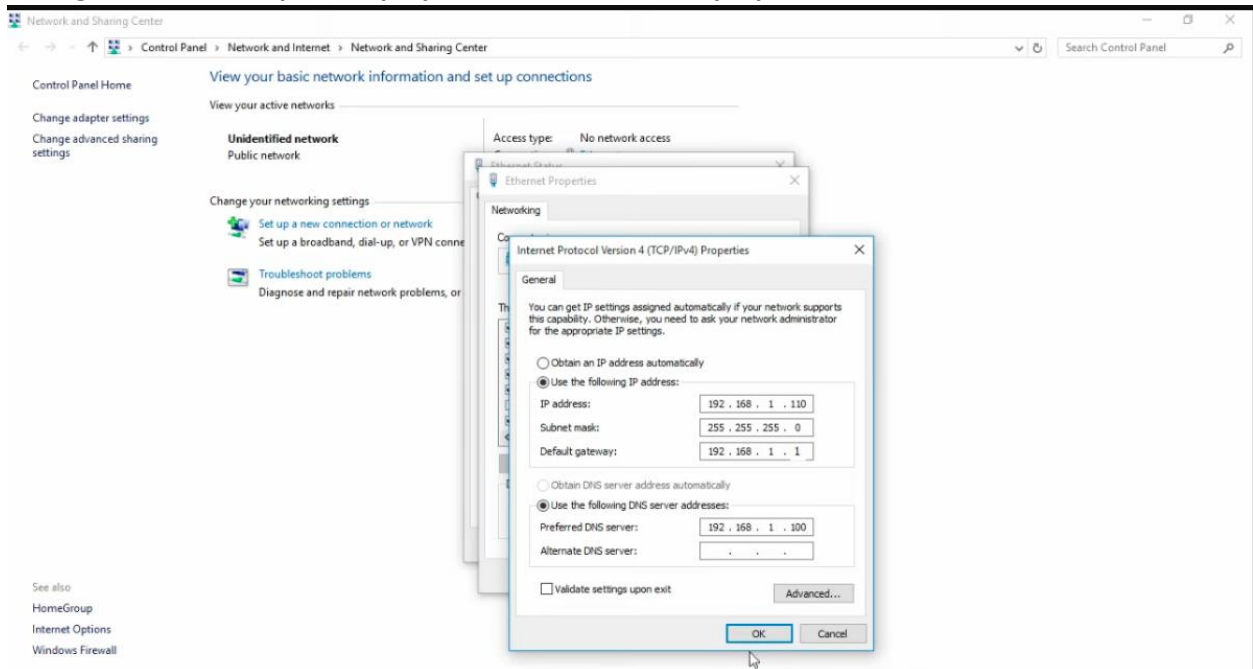

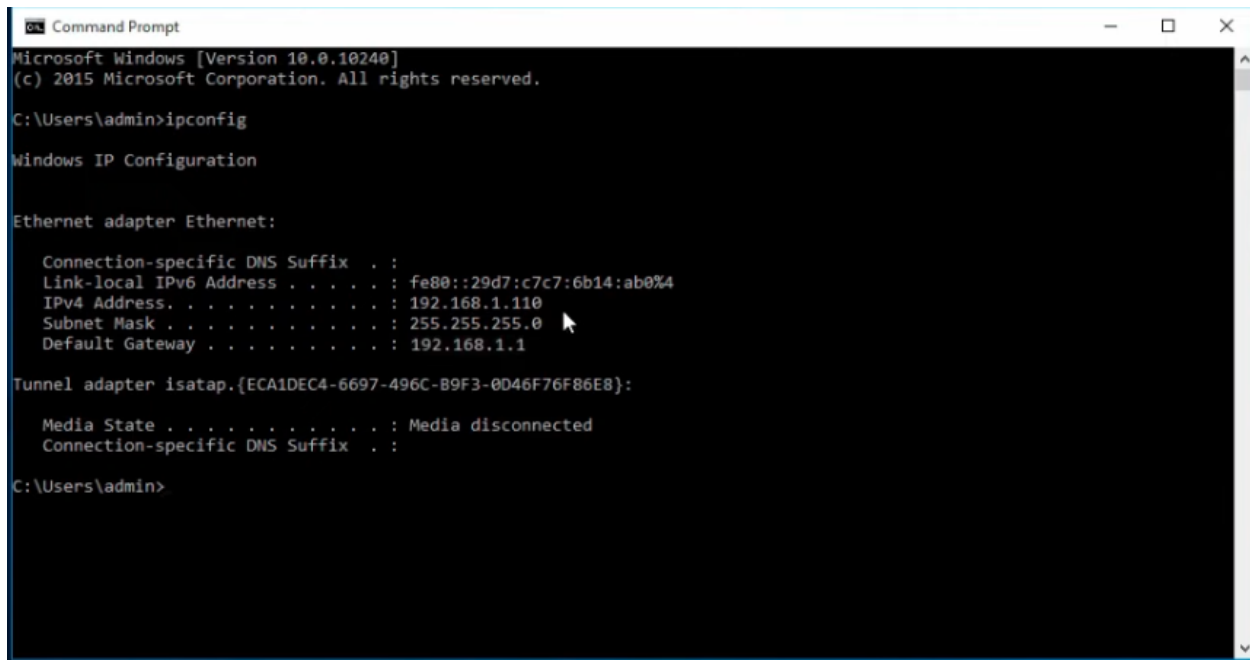

Assignment Manual IP

Then go to: Ethernet option -> properties -> select IPV4 -> properties

Now, First check the assigned IP

```
Microsoft Windows [Version 10.0.10240]
(c) 2015 Microsoft Corporation. All rights reserved.

C:\Users\admin>ipconfig

Windows IP Configuration

Ethernet adapter Ethernet:

    Connection-specific DNS Suffix  . : 
    Link-local IPv6 Address . . . . . : fe80::29d7:c7c7:6b14:ab0%4
    IPv4 Address. . . . . : 192.168.1.110
    Subnet Mask . . . . . : 255.255.255.0
    Default Gateway . . . . . : 192.168.1.1

Tunnel adapter isatap.{ECA1DEC4-6697-496C-B9F3-0D46F76F86E8}:

    Media State . . . . . : Media disconnected
    Connection-specific DNS Suffix  . : 

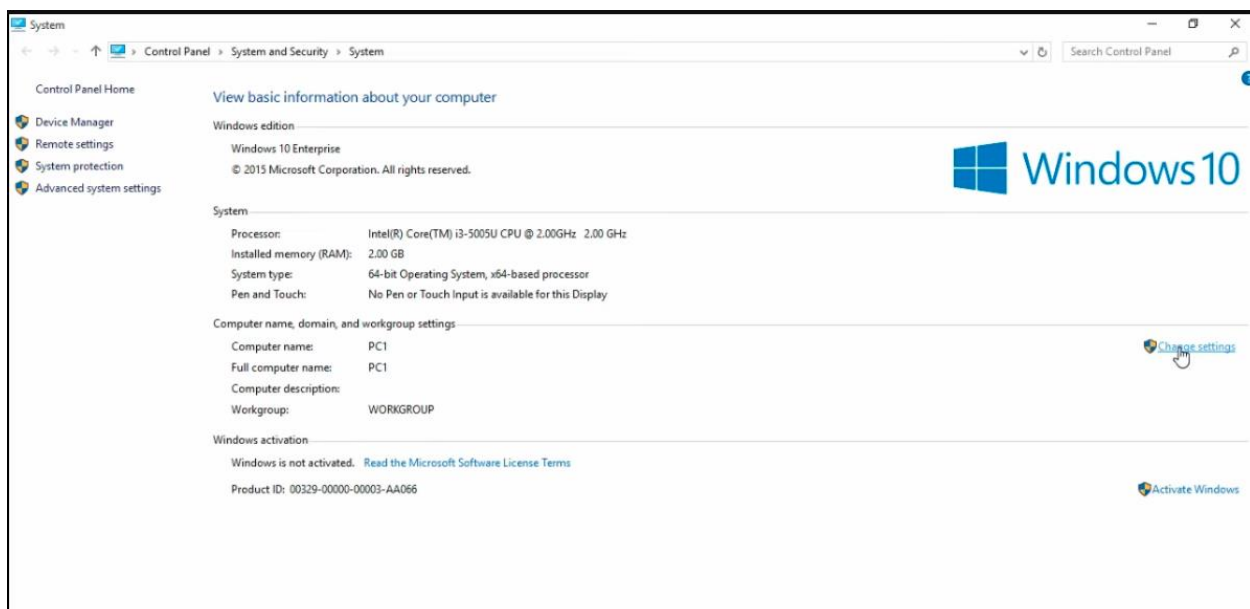

C:\Users\admin>
```

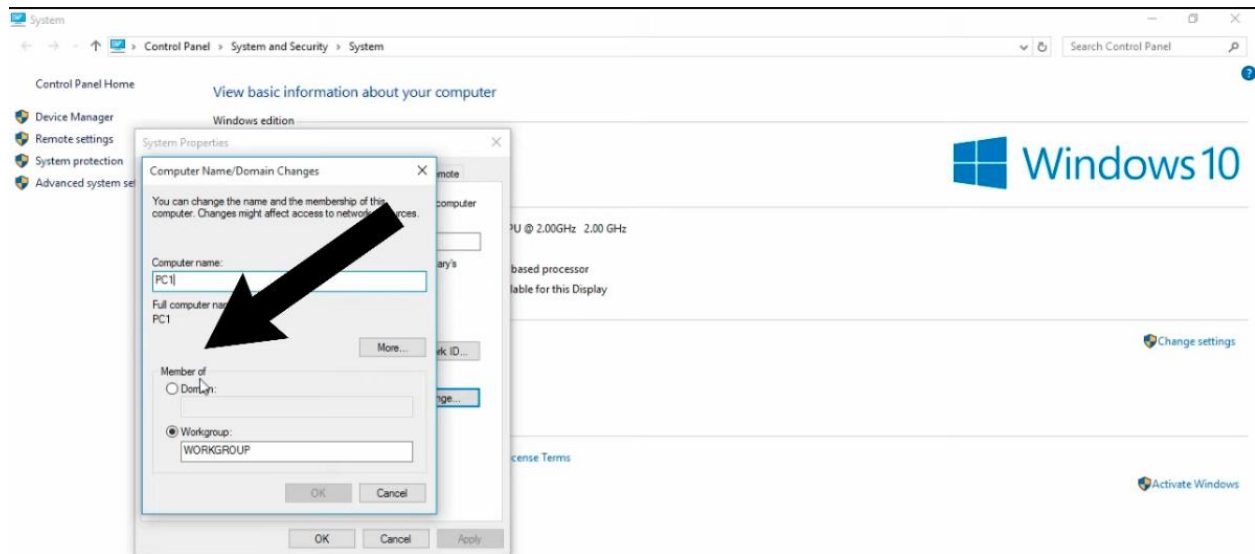

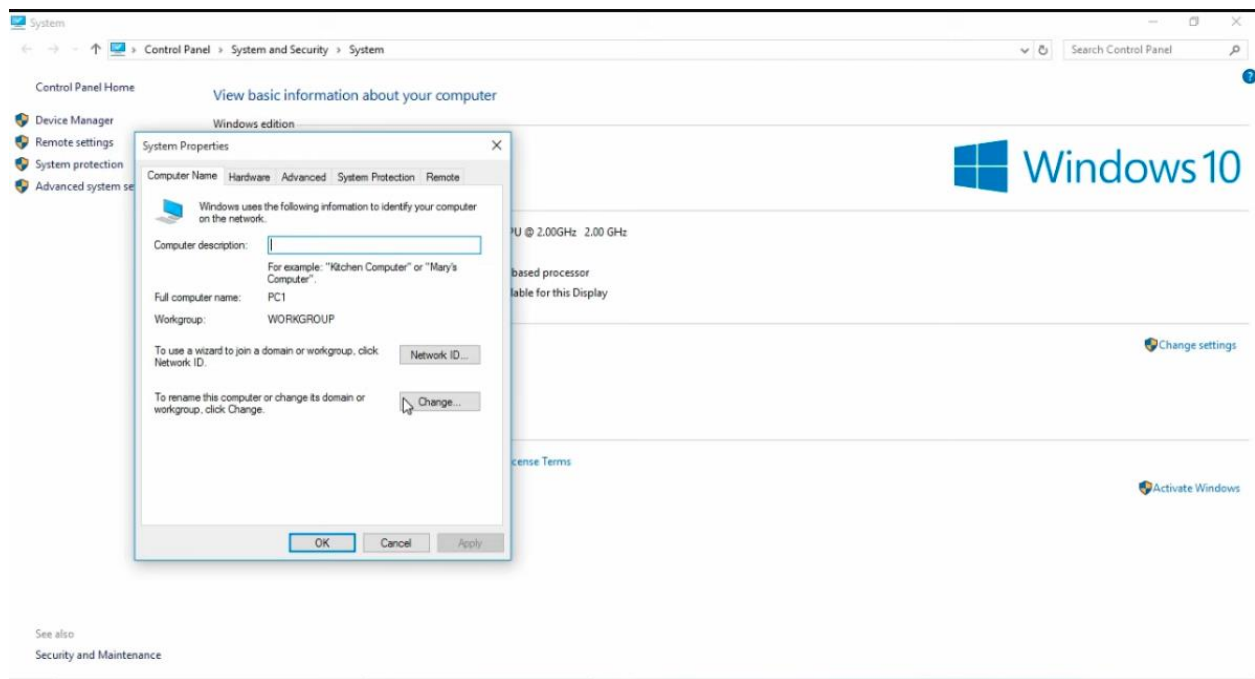

And for further detailed information type ipconfig /all

Now ping to the server -> ping (server address) 192.168.1.100

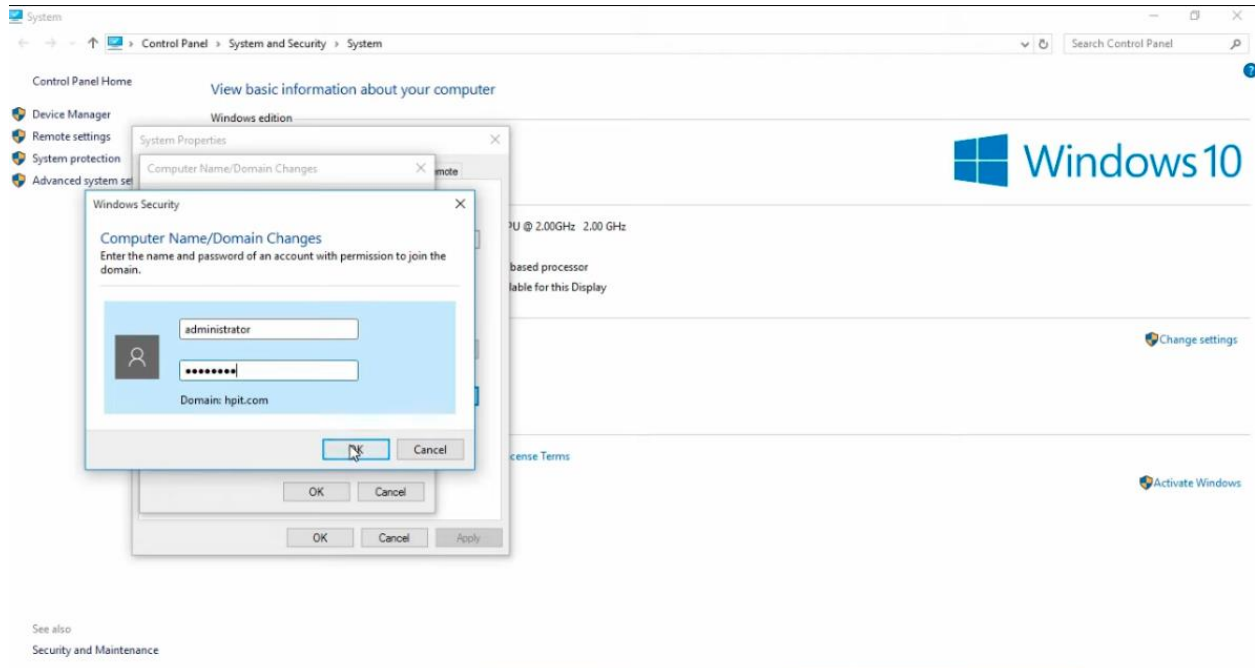

Then also verify DNS nslookup server1.domainname.com

Now assign the domain name

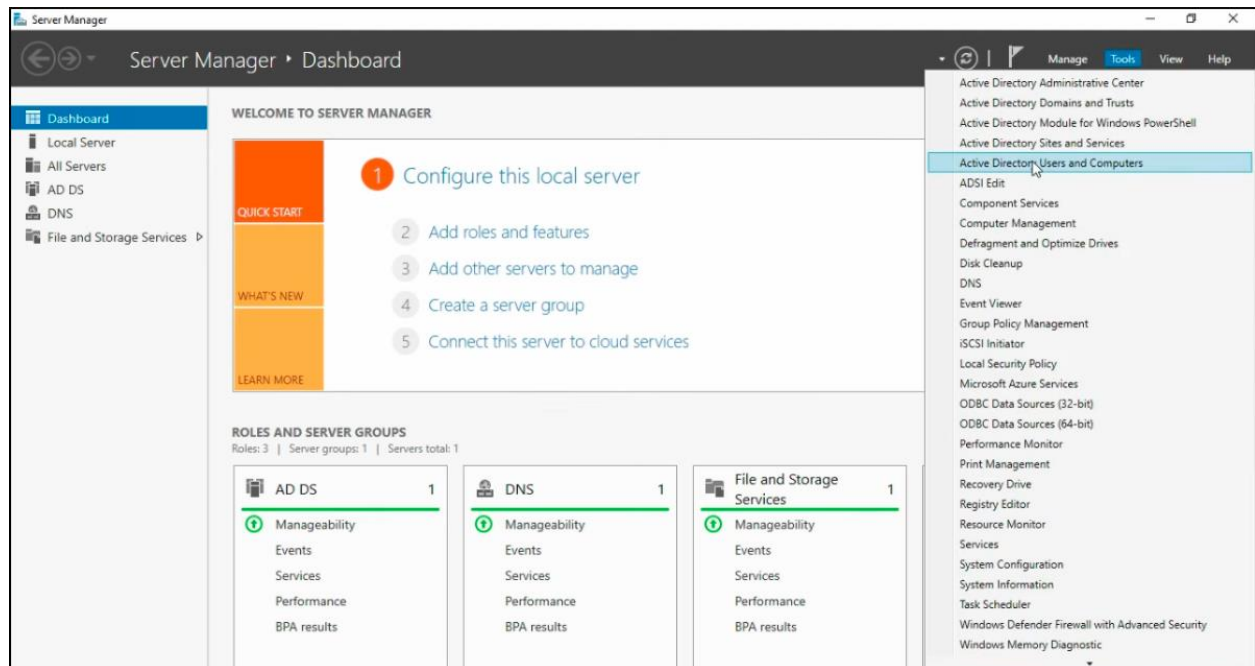

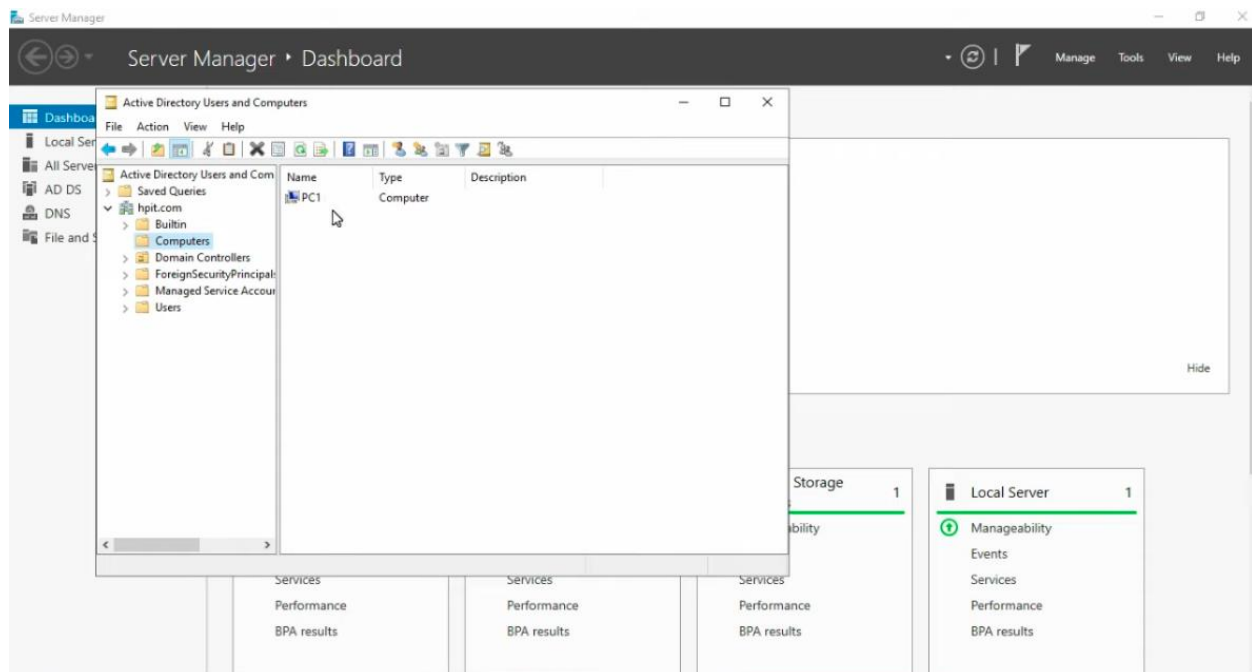

Click on domain and gives your windows server 2019 domain name as defined there

Now verify from the server

After restart the windows type your domainofserver\administrator and password
